

EXPERIENCE THE  
**SMART LIVING**

The objective was to build a premium camper van to make the client's lengthy commutes with family, safe and relaxing.

The project is built on a **Force traveller 4020**, which has Mercedes-derived, highly powerful, and fuel-efficient FM 2.6 CR power train engine with a monocoque body that ensures total safety and car-like ride quality.

- As per the client's requirements, we designed the camper van's floor plan with all the premium facilities that any RV could have. The floor plan consisted of a living area with spacious and comfortable seating, a micro kitchen, and a shower. With these facilities, we ensured the project provided aluxurious travel experience.
- With the base model and floor plan in place, we were on to the camper van's exterior design. We wanted to create a benchmark for a camper van in India. So we added sleek design and modern elements that perfected the vehicle for RV enthusiasts and people who traveled with style and comfort.

# A perfect place to relax

## Engineered Recliners.

The recliners are comfortable, stylish, and easy to use. The built-in function will help to maintain a better posture and avoid muscle stress while traveling.

## Epitome of Luxury and Comfort.

The sofa has a stylish design with plush cushions that will keep one relaxed. The bed is equally comfortable, with a firm mattress and luxurious bedding. It is the perfect furniture for a caravan, providing both comfort and style.

## Convenient for Long Trips.

The bathroom has a shower that has an electric heater, a sink, and a toilet. The toilet is a standard caravan toilet, with a small sink and a flush. It's small but perfectly formed, with everything needed for a clean and comfortable journey.

## Whip Up a Quick Meal on the Go.

The caravan's kitchen is a small but mighty space that is equipped with essentials for food prep. There is a small oven for baking, a micro refrigerator for storing perishables, and induction cooktops for cooking.

## A Breath of Fresh Air.

This caravan air conditioner is a top-of-the-line unit designed for use in RVs and campers. It is a split system that features both cooling and heating capabilities, making it ideal for use in any climate. The unit is made in Germany and is known for its high quality, efficiency and durability.

## A Ride on the Cloud.

The smooth air suspension in this caravan provides a comfortable and smooth ride while traveling. It helps to reduce bumps and vibrations, making for a more enjoyable journey.

## Moving Like a Breeze.

The caravan's body is made of a lightweight yet strong fiber material, which is smooth and aerodynamic. The shape of the caravan is sleek and angular, designed to cut through the air with ease.

## The Water Watcher.

This water tank indicator is very useful for caravan travelers as it helps to keep track of water availability while on the road.

**"We took our caravan on a 900-kilometer journey and were very comfortable the entire time. The seats and recliners are very comfortable and made the journey of 16 hours smooth. We had a great time and would recommend capsules smart living to anyone."**

Owner of Capsules Camper Van 4020  
(Identities of our clients are confidential)

The caravan we built for this client was definitely a key moment for us as a company. It allowed us to show our skills and dedication to quality craftsmanship, and we are proud to have been able to contribute to the great experience. This opportunity has made Capsules a key player in the industry. Thanking the client for the trust and confidence in us - we truly appreciate it.
